

ESCAPE BORING! JOIN US!

Work when you want, where you want and how you want!

- You will love your Job @ OR! You, a **talented and proactive .NET (fullstack) developer (m/f/d)**, will be responsible for ensuring **successfull support in different international projects** that are shaping the future of how automotive industry builds interconnected services.
- Payment - We'd love to unite the best minds under one roof. To achieve that, we aim to make you (also) happy with your salary. We will **start our negotiations with Euro 2.100 net** per month. We are ready to prepare a more than **attractive salary package** for you - based on your qualifications and experience.
- Personal growth and professional development - With our coach we ensure your **personal growth** based on your needs. Needless to say there is a **budget for training and conferences for every employee**.
- Events and get-togethers - We are technically the best, but unbeatable when it comes to **celebrating** our collective successes. That is why we enjoy grabbing a drink after work, doing a sailing trip at the company event and trying new fun things together :)
- Healthy environment with drive - We live in a **jovial and driven atmosphere** with open communication and a positive feedback culture.

Who we are

OpenResearch (OR) is a creative engineering company full of skilled developers, architects, designers, product owners and testers with a focus on mobility and connected vehicle solutions.

We strive to live our corporate culture every day:

- Exciting, impactful and international projects with professional development opportunities.
- Personal responsibility, trust, room for your own growth.
- Agile working environment with a fully remote and/or hybrid model.
- Healthy working conditions and a well-functioning, driven team atmosphere.
- Cooperative relationship with team leaders - close and direct working atmosphere.
- Functioning culture of failure - we live a transparent communication and feedback culture.
- Direct and short communication paths.
- Openness for your innovative ideas.
- Working with modern technology and high-quality IT-solutions.

We are international. We work from Austria, Germany, Kosovo and Croatia having clients and projects around the world.

What you would do

You will be developing **web applications based on latest frontend and backend technologies** with frameworks like **ASP.NET Core and Angular**.

Together with our clients we're building **web based frontends with REST backends** and would appreciate you bringing in your knowledge and experience on both sides.

What skills we are looking for

- .NET technology (C#, .NET Core).
- ASP.NET.
- Entity framework.
- Azure.
- App Services / Function Apps.
- Git.
- JavaScript (ES6/7, Promises, etc.).
- TypeScript.
- Confident with HTML & CSS.
- Innovative thinker with eagerness to find creative solutions.
- Passionate and committed approach to create high quality products.
- Self-motivated, proactive personality striving to improve and learn continuously.
- Enthusiastic about trying out new technologies.
- Fluent in **English** (Text & Speech) & **German** (Text & Speech)
- **(+)** Experience with Azure, OpenAPI/Swagger, CICD, GitLab, Terraform.
- **(+)** Experience with frontend frameworks (Angular, Vue, React).

Be part of our innovative team and let's ship great applications together!

We'd love to meet you :)
