

ESCAPE BORING! JOIN US!

Work when you want, where you want and how you want!

- You will love your Job @ OR! You, a **talented and proactive frontend developer (m/f/d)**, will be responsible for **ensuring successful support in different international projects** that are **connecting millions of users** with our customer's backend applications.
- Payment - We'd love to unite the best minds under one roof. To achieve that, we aim to make you (also) happy with your salary. We are ready to prepare a more than **attractive salary package** for you - based on your **qualifications and experience**. In accordance with the law, we list the gross salary according to **ST1** IT collective agreement 2023 (**minimum**: € 2.854) as the legal basis.
- Personal growth and professional development - With our coach we ensure your **personal growth** based on your needs. Needless to say there is a **budget for training and conferences for every employee**.
- Events and get-togethers - We are technically the best, but unbeatable when it comes to **celebrating** our collective successes. That is why we enjoy grabbing a drink after work, doing a sailing trip at the company event and trying new fun things together :)
- Healthy environment with drive - We live in a **jovial and driven atmosphere** with open communication and a positive feedback culture.

Who we are

OpenResearch (OR) is a creative engineering company full of skilled developers, architects, designers, product owners and testers with a focus on mobility and connected vehicle solutions.

We strive to live our corporate culture every day:

- Exciting, impactful and international projects with professional development opportunities.
- Personal responsibility, trust, room for your own growth.
- Agile working environment with a fully remote and/or hybrid model.
- Healthy working conditions and a well-functioning, driven team atmosphere.
- Cooperative relationship with team leaders - close and direct working atmosphere.
- Functioning culture of failure - we live a transparent communication and feedback culture.
- Direct and short communication paths.
- Openness for your innovative ideas.
- Working with modern technology and high-quality IT-solutions.

We are international. We work from Austria, Germany, Kosovo and Croatia having clients and projects around the world.

What you would do

You will be developing web applications based on latest frontend technologies with web frameworks like Angular or Vue. Together with our clients we're building web based products with REST backends.

You will be embedded into a motivated, full functional team of developers and work closely with our product owner to define the next steps.

This is a position for an energetic, motivated individual who likes to deliver working software frequently and give continuous attention to technical excellence.

What skills we are looking for

- Solid JavaScript knowledge (ES6/7, Promises, etc.).
- Confident HTML & CSS knowledge.
- Experience with frontend frameworks (Angular, Vue, React).
- Passionate and committed approach to create high quality products.
- Self-motivated, proactive personality striving to improve and learn continuously.
- Enthusiastic about trying out new technologies.
- Innovative thinker with eagerness to find creative solutions.
 - (+) Typescript knowledge.
 - (+) RxJS knowledge.
 - (+) Familiar with Ionic.
 - (+) Experience with reactive state manager pattern (NgRx/Vuex/Redux).
 - (+) OpenAPI.
 - (+) Spring Boot API development with Java/Kotlin.
 - (+) Database knowledge / SQL.
 - (+) UML.

Be part of our innovative team and let's ship great applications together!

We'd love to meet you :)
